

THE TRAINING KIT SUPPORTING CLEANROOM BEST PRACTICE

KlerReveal™ Operator Training Kit

Training and Cleaning Validation Kit

The KlerReveal Operator Training Kit offers a range of key items suitable for all types of contamination control training. The kit includes a red powder and glow lotion containing artificial 'contamination' that illuminates under UV light. The handheld torch and light box are used to cast UV light over the area and reveal the contamination.

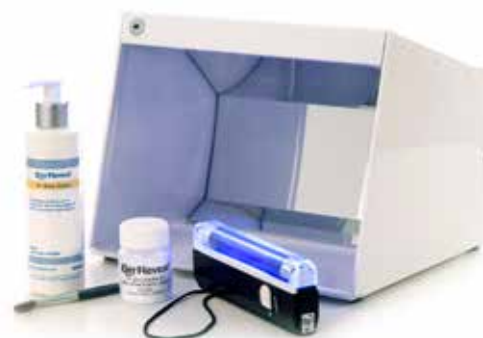

The KlerReveal Operator Training Kit can be used to demonstrate to technicians the key aspects of contamination control.

These include:

- ▲ Ensuring hand hygiene best practice is always applied
- ▲ Evaluating how much protection your gloves have
- ▲ Correct "spray and wipe" transfer disinfection techniques
- ▲ Illustrating the ease of cross contamination
- ▲ Demonstrating environmental contamination or aseptic techniques

The KlerReveal Training Kit consists of:

- ▲ UV LED Light Box
- ▲ KlerReveal Hand Held 4W UV Torch (requires AA batteries)
- ▲ KlerReveal Red UV Glow Powder
- ▲ KlerReveal UV Glow Hand Cream
- ▲ 1 Brush
- ▲ Bag for carrying the light box

Training and Cleaning Validation Kit

Why Use the KlerReveal Operator Training Kit?

IMMEDIATE RESULTS

KlerReveal enables you to demonstrate immediately to an operator that there is a problem with a particular disinfection technique. Artificial "contamination" is instantly clearly visible under the UV light as coloured luminescence contrasting against the UV light.

IDENTIFY CONTAMINATION RISKS

KlerReveal can be used to evaluate various contamination risks, for example through pin-prick holes in gloves, or the spread of contamination in specific areas.

EASY TO USE

The equipment does not require any special training to operate and is supplied with full instructions.

COST EFFECTIVE

KlerReveal is an invaluable ally in improving contamination control techniques and reducing the risk of costly errors in production.

HEALTH AND SAFETY

All of our UV light equipment is supplied with comprehensive operation instructions – including maximum permissible exposure times for the unprotected skin and eye at specified distances from the UV lamp, enabling strict compliance with EU rules, defined by the Optical Radiation Directive 2006/25/EC.

VALIDATION

Supplied by an ISO 9001:2015 and ISO 14001:2015 accredited company.

MSDSs available on request for the powder and lotion.

ORDERING INFORMATION

	PRODUCT NAME	UNIT SIZE	UNIT OF SALE
1	KlerReveal Operator Training Kit	-	1
	KlerReveal Operator Training Kit (EU Version)	-	1
2	KlerReveal Red UV Glow Powder	50 g	4 x 50 g
3	KlerReveal UV Glow Cream	200 ml	4 x 200 ml
