## GLOBAL TECHNICAL CONSULTANT PROFILE

### EXPERIENCE

Denis Streitt BSc, is a graduate microbiologist with more than seventeen years' experience within the pharmaceutical industry as a Microbiologist based in France.

He has held several roles of increasing responsibility, from analyst up to department coordinator in an international pharmaceutical manufacturing facility.

Denis has experience of working within Quality Control laboratories and cleanrooms supporting the manufacture of non-sterile pharmaceutical drugs. He is experienced in GMP/GLP requirements and has presented in regulatory audits as a subject matter expert on topics including environmental monitoring trending and root cause analysis, and water systems.

Denis is also experienced in supplier quality management, performing manufacturer, supplier

and contractor approvals. Part of his responsibilities involved leading on site audits. In addition Denis was a GMP qualified trainer and was responsible for the training of new employees and provide ongoing general Microbiology awareness courses to the whole site.

Denis joined Ecolab in 2022 as a Global Technical Consultant for Ecolab Life Sciences for Contamination Control. This is a technical role advising on best practice application techniques, and the use of specialist cleanroom biocides for Life Sciences cleanrooms in line with current regulatory expectations and industry standards.
